São Luís - MA

| PYTHON | SQL | DATA ANALYSIS | BUSINESS INTELLIGENCE |

Professional Summary

Data Analysis and Data Science professional with strategic experience in the public sector (City Hall of São Luís) and innovation ecosystems (Inova Maranhão). Technical expertise in handling large volumes of data using Python (Pandas). Demonstrated ability to elevate institutional intelligence through the creation of high-performance dashboards in Qlik, Power BI, and Tableau, as well as relational database modeling (MySQL/PostgreSQL/PL/SQL). Experience in implementing process automations via N8N and developing ETL pipelines.

Experience

DATA ANALYST | CITY HALL OF SÃO LUÍS | 03/2026 - Present

Working as a junior data analyst at the City Hall of São Luís, with the following responsibilities:

- Development of dashboards and reports in Qlik, focused on performance indicators and metrics tracking;
- ETL processes and data migration between different sources, performing extraction, transformation, and loading to organize and standardize databases;
- Data extraction and manipulation with SQL and PL/SQL in Oracle, running complex queries with JOINS, aggregations, filters, and subqueries;
- Development of applications in AppSheet, with automation creation and database integration.

DATA ANALYSIS INTERN | CITY HALL OF SÃO LUÍS | 06/2025 - 03/2026

As an intern at the City Hall of São Luís, responsibilities included:

- Data analysis and exploration with Python, as well as preparation of reports and dashboards in Qlik;
- Manipulation of various data types, including geographic data (via GeoPandas/QGIS);
- Modeling and manipulation of relational databases, including table and view creation;
- ETL processes and data migration between different sources, performing extraction, transformation, and loading to organize and standardize databases;
- Process automation with N8N.

SCHOLARSHIP HOLDER | INOVA MARANHÃO | 03/2024 - 09/2024

As a scholarship holder in the Data Science Track at Inova Maranhão, worked on tasks including:

- Data exploration to discover patterns capable of generating insights;
- Data cleaning and preprocessing (Pandas/NumPy) to ensure analysis integrity;
- Dashboard implementation in Power BI and Tableau;
- Preparation of analytical data reports;
- Use of Git and GitHub for version control of data analysis projects.

Education

- Bachelor's Degree in Computer Science – Federal University of Maranhão | 06/2021 – 03/2026
- Technical Degree in Information Technology – Federal Institute of Maranhão | 01/2018 – 01/2021

Skills & Certifications

- Programming Languages:
 - Python, C, and JavaScript
 - Programming Logic (Alura – 2024), Python Training (Share People Hub – 2022)
- Data Science:
 - Power BI, Tableau, QLIK, Apache Spark, Pandas, NumPy, and Matplotlib
 - Google Sheets, Tableau, Looker Studio, Python (Alura – 2024), Data Science Track (Inova Maranhão – 2024)
- Databases:
 - MySQL, PostgreSQL, and Oracle SQL
 - Database Track (Fundação Bradesco – 2025)
- Languages:
 - Portuguese (Native), English (Advanced), Spanish (Basic)
- Office Applications:
 - Google Workspace (Advanced) and Microsoft Office (Advanced)
